Summary

- The overall market for computer Vision was valued at USD \$2.9B in 2018 and is expected to reach USD \$33.5B by 2025 at a CAGR of 42% during the forecast period (Tractica, 2020)
- While all verticals are expected to see strong growth, the largest markets for CV over the next 5 years are expected to be consumer, healthcare, automotive, retail, and advertising
- As computer vision goes horizontal, we expect to see significant value being created by companies
 using CV to solve specific problems as opposed to generic software tools
- Within enabling technologies, primary beneficiaries will be suppliers of components for mobile and edge-based vision systems – low power, high performance processors, image sensors, and VCSELs
- In automotive, NVIDIA and Intel (Mobileye) dominate the processor market but are being chased by Ambarella, Qualcomm, and 60+ AI semiconductor startups
- China continues to lead the world in terms of investment in CV startups and patents filed for AI and CV.
