

The logo for the 2021 Embedded Vision Summit Virtual. It features the year '2021' in a light blue font at the top. Below it, the word 'embedded' is in a smaller, dark blue font. The word 'VISION' is in a large, bold, dark blue font, with the letter 'O' replaced by a colorful circular graphic composed of many small dots. Below 'VISION' is the word 'summit' in a dark blue font. At the bottom, the word 'VIRTUAL' is in a green font, followed by a vertical bar and the dates 'MAY 25-27' in a light blue font. The entire logo is set against a white background with a subtle grid pattern, which is itself centered on a larger graphic of overlapping green and yellow triangles.

Uncode AI

Code-free Development, Delivery and Maintenance of Edge AI Applications

Dmitry Zakharchenko
VP, Research & Development
Blaize

The Edge AI Adoption Challenge

Difficult, costly & too complex to take models to production and build solutions

Seamless hardware & software

The key to edge AI adoption

Today's largely manual
deployment methods will be
displaced by

**AI supported knowledge-
driven platforms.**

End to End Workload Processing

- Process AI and non-AI workloads on same chip
- End-to-end software development

Comprehensive AI Edge SW Platform

- Libraries/pre-built models
- Model Optimization
- Pruning/Compression

Edge DevOps

- Model lifecycle
- Federated learning
- Containers

What Slows AI Adoption Today

Barriers to AI adoption are still high

Retail company wants to teach in-store cameras to detect potential buyers and provide real-time promotions to close sales.

Where do we get data
to learn from?

Training
Data Quality and
Shortage

How to code it without
prior expertise?

Difficult UIs and
Programming
Languages

How do we explain
the results?

Lack of
Explanation
in AI

Does the high cost
justify returns?

Significant Costs
of
Compute and Talent

Empower Enterprises to Achieve Edge AI ROI

Bridge the Chasm between AI Research & Production AI Applications

2021

summit

Blaize AI Solution

The power of Blaize software & hardware working together E2E effortlessly

How?

Automated and collaborative development

MLOps for Edge AI

Ease of use: code-free, intelligent user experience

Efficient hardware

4

"It only took me 3 weeks to develop a model. It's been 11 months, and we still haven't deployed it."

Dinesh Nirmal, IBM

"There is a huge gap hindering AI edge adoption, from end-to-end workload processing, lack of a comprehensive edge SW platform and edge devops"

Aditya Kaul, Omdia

Comprehensive AI Applications

Productization for Edge AI Solutions

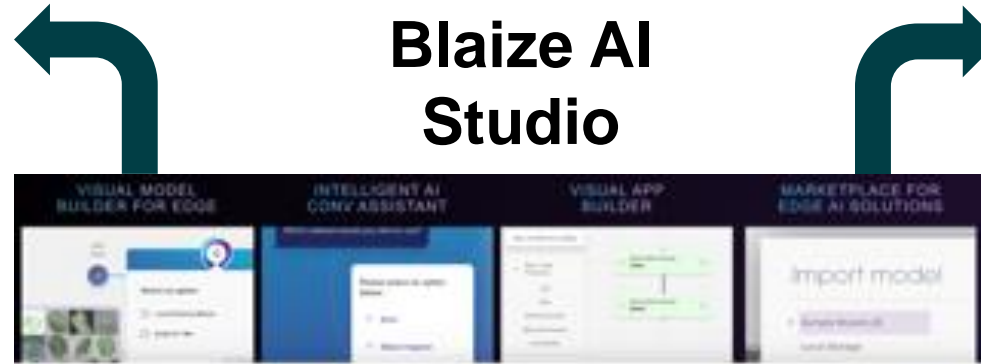

Build Edge AI apps in minutes not weeks

Unique Transfer Learning on Edge now even for Detection Use Cases

Bring training to Edge

AI Optimization techniques compress 98% of features with <2% of accuracy loss

Blaize AI Studio

AI SOFTWARE DEVELOPMENT PLATFORM OF
Industry-Firsts

Harness know-hows from industry-first Edge AI Platform

Knowledge platform that supplements Data Scientist and ML Engineers

Remove complexity of setting and operating Edge AI Solutions

Configure, monitor and update deployed Edge AI systems via intelligent MLOps

Give customers freedom to use marketplaces or build from scratch

Uncode AI = Uncomplicate AI

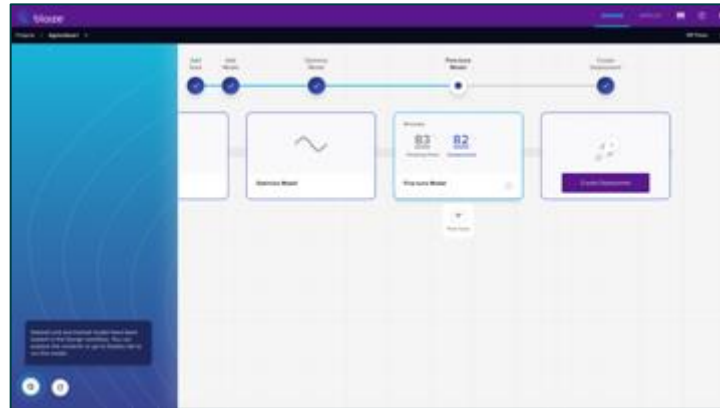

From problem to production

AI Studio

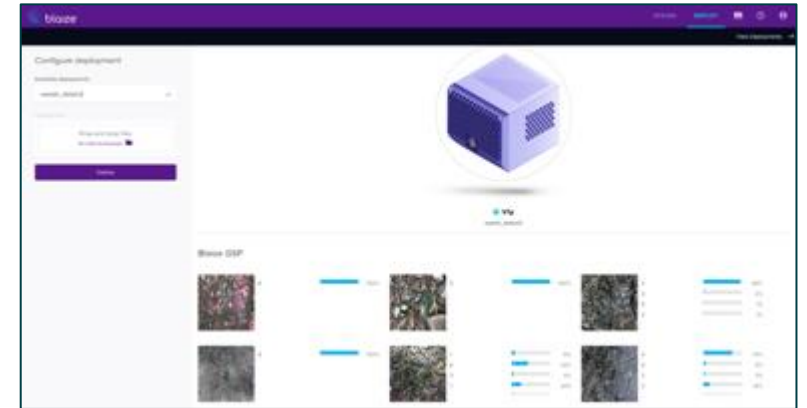

Prepare & Train

Deploy & Manage

Use & Monitor

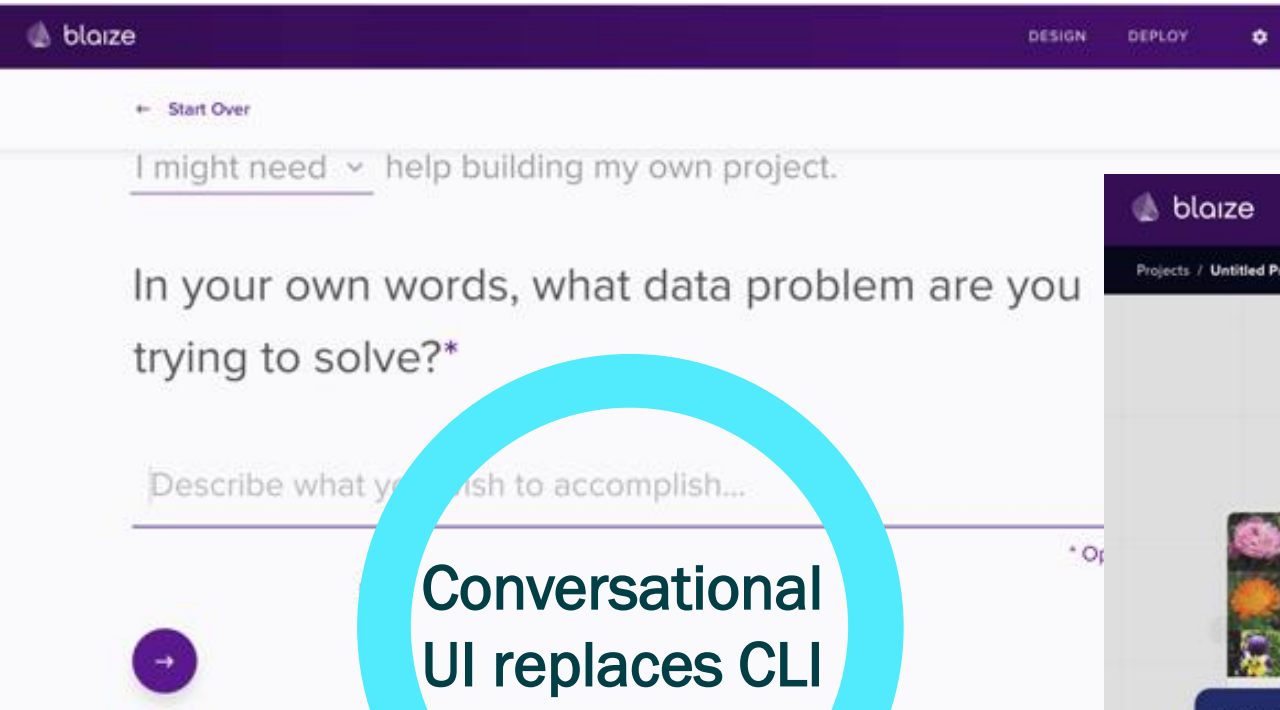

GPU

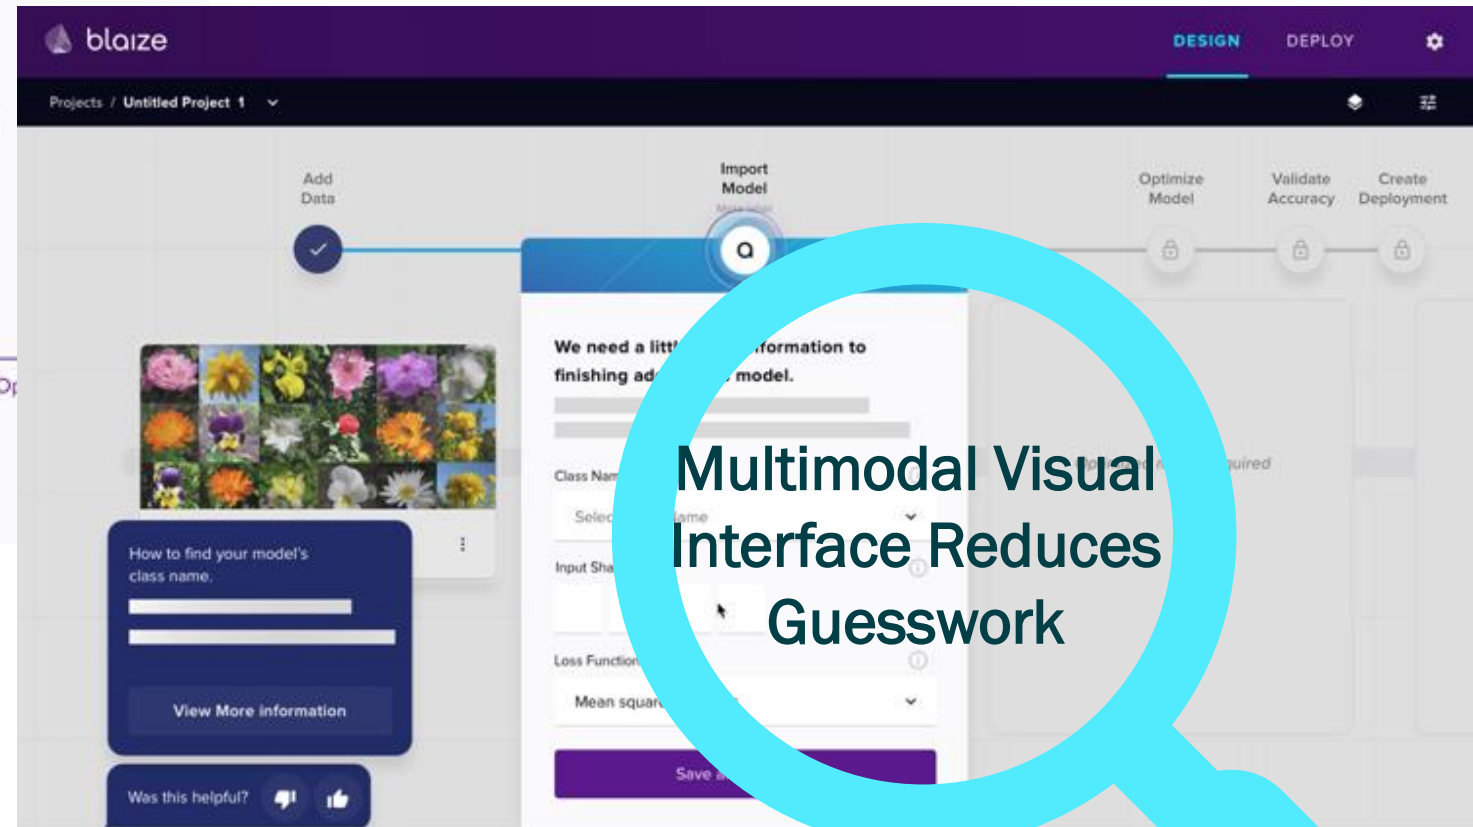

Command Over "Command Line"

Visual drag-and-drop and Conversational Interfaces

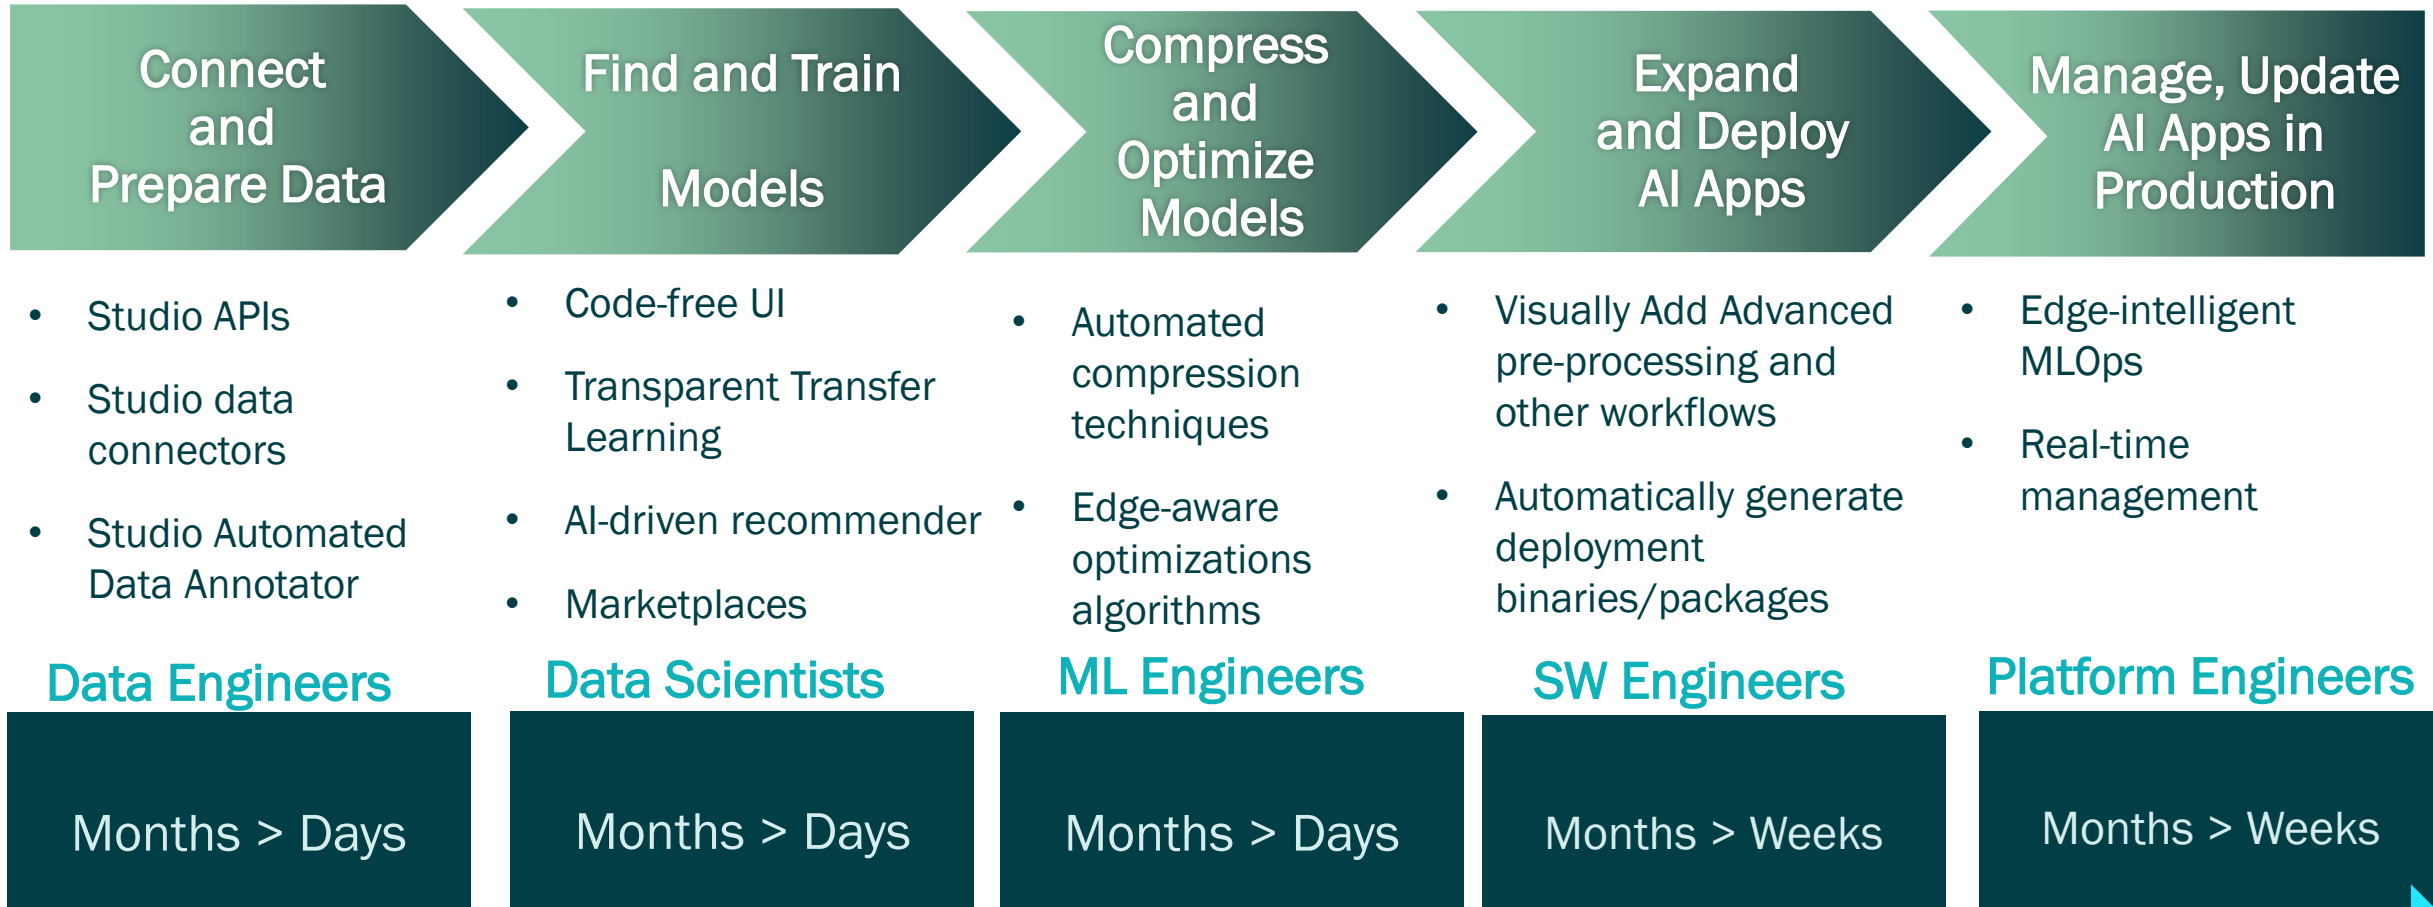

Conversational
UI replaces CLI

Multimodal Visual
Interface Reduces
Guesswork

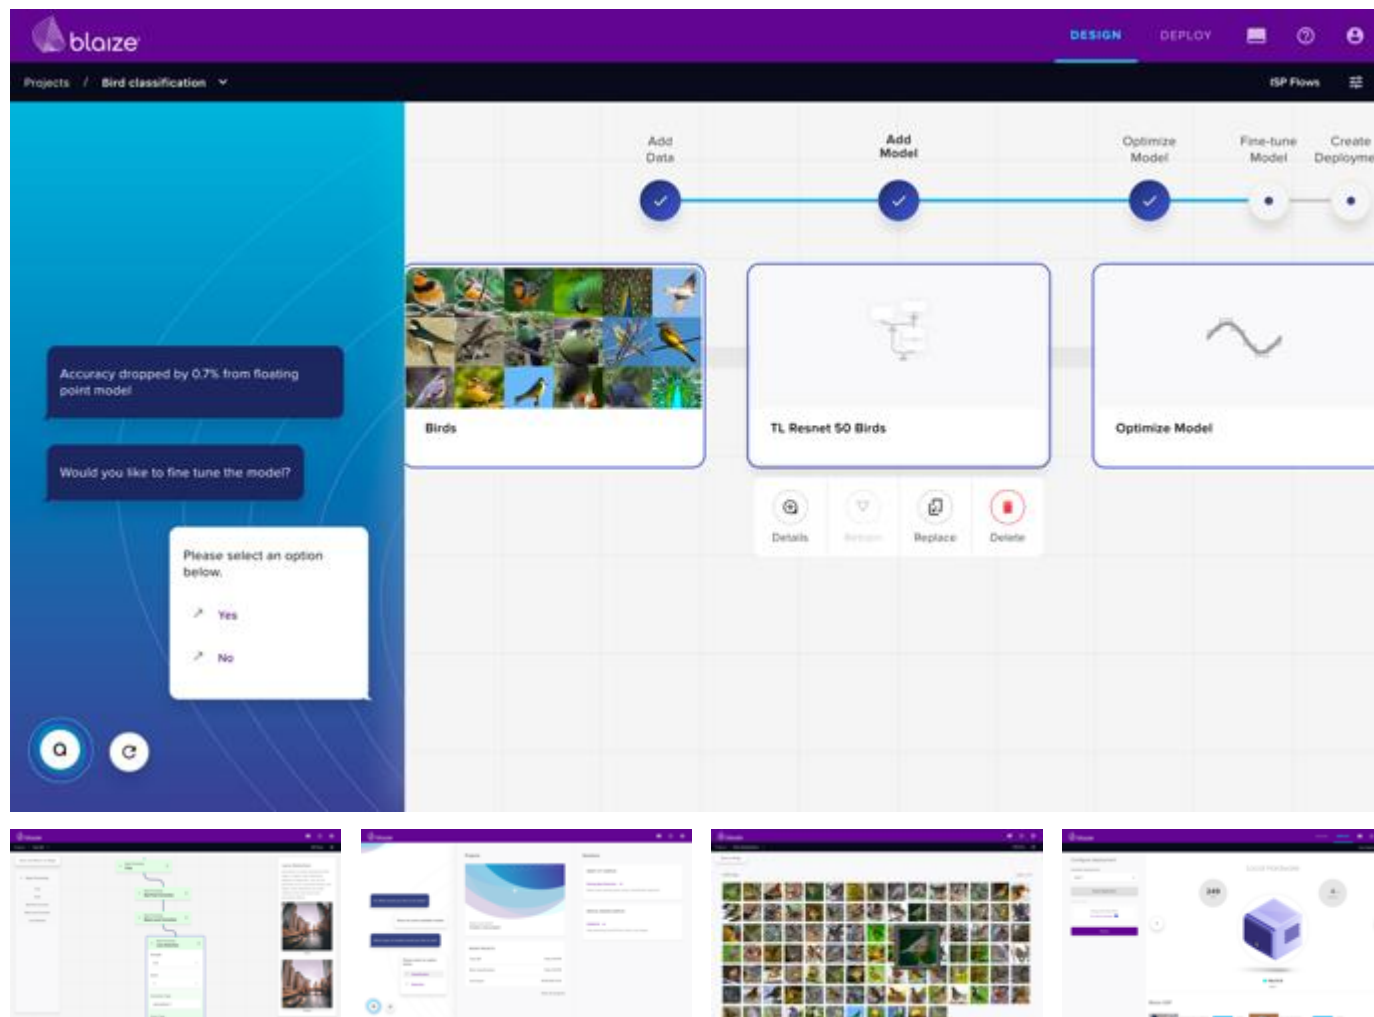

Transform AI Development Process, Make it Easier

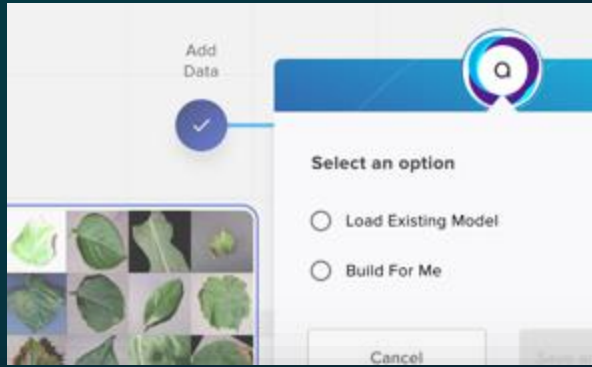

AI Studio brings one team together to collaborate with SMEs

First **Open AI**
Software Development
Platform Spanning the
entire Edge AI Application
Lifecycle **Transparently**

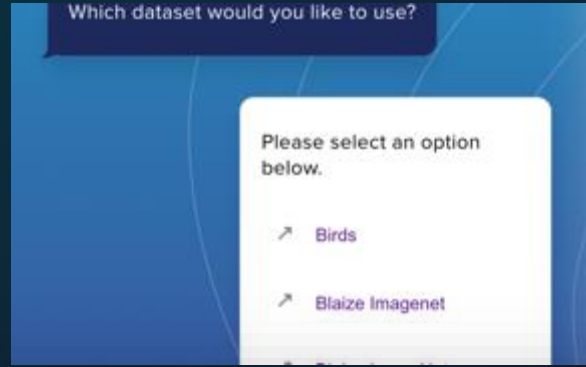

Transform edge AI operational
workflow from idea to
development, deployment and
management.

VISUAL MODEL BUILDER FOR EDGE

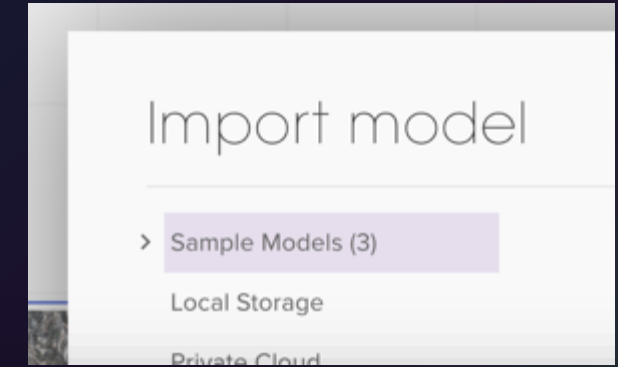

INTELLIGENT AI CONV ASSISTANT

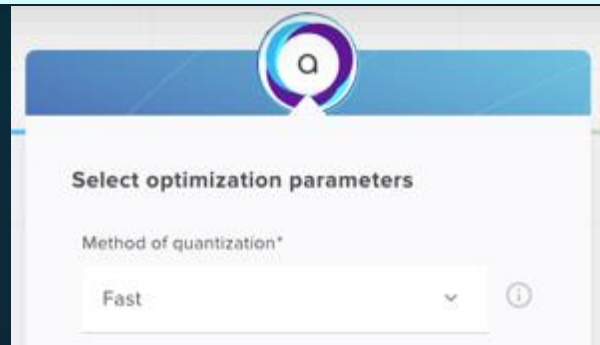

VISUAL APP BUILDER

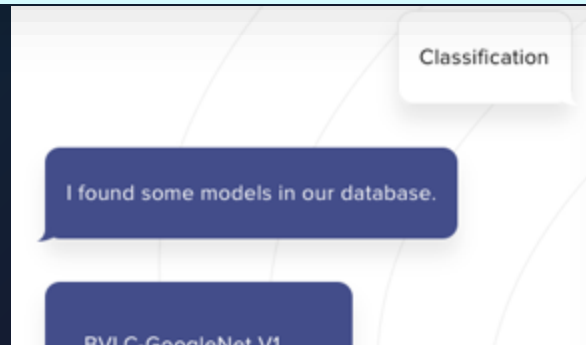

MARKETPLACE FOR EDGE AI SOLUTIONS

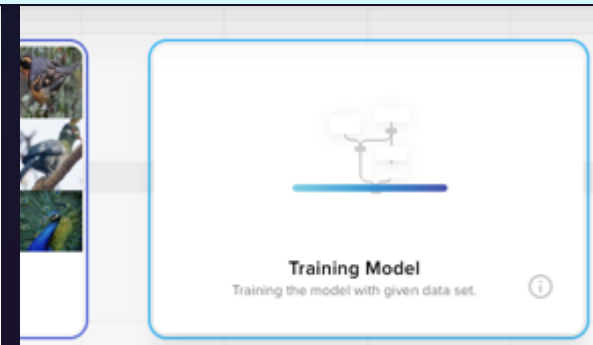

AI SOFTWARE DEVELOPMENT PLATFORM OF Industry-Firsts

EDGE-AWARE OPTIMIZATIONS

KNOWLEDGE-DRIVEN ASSISTANCE

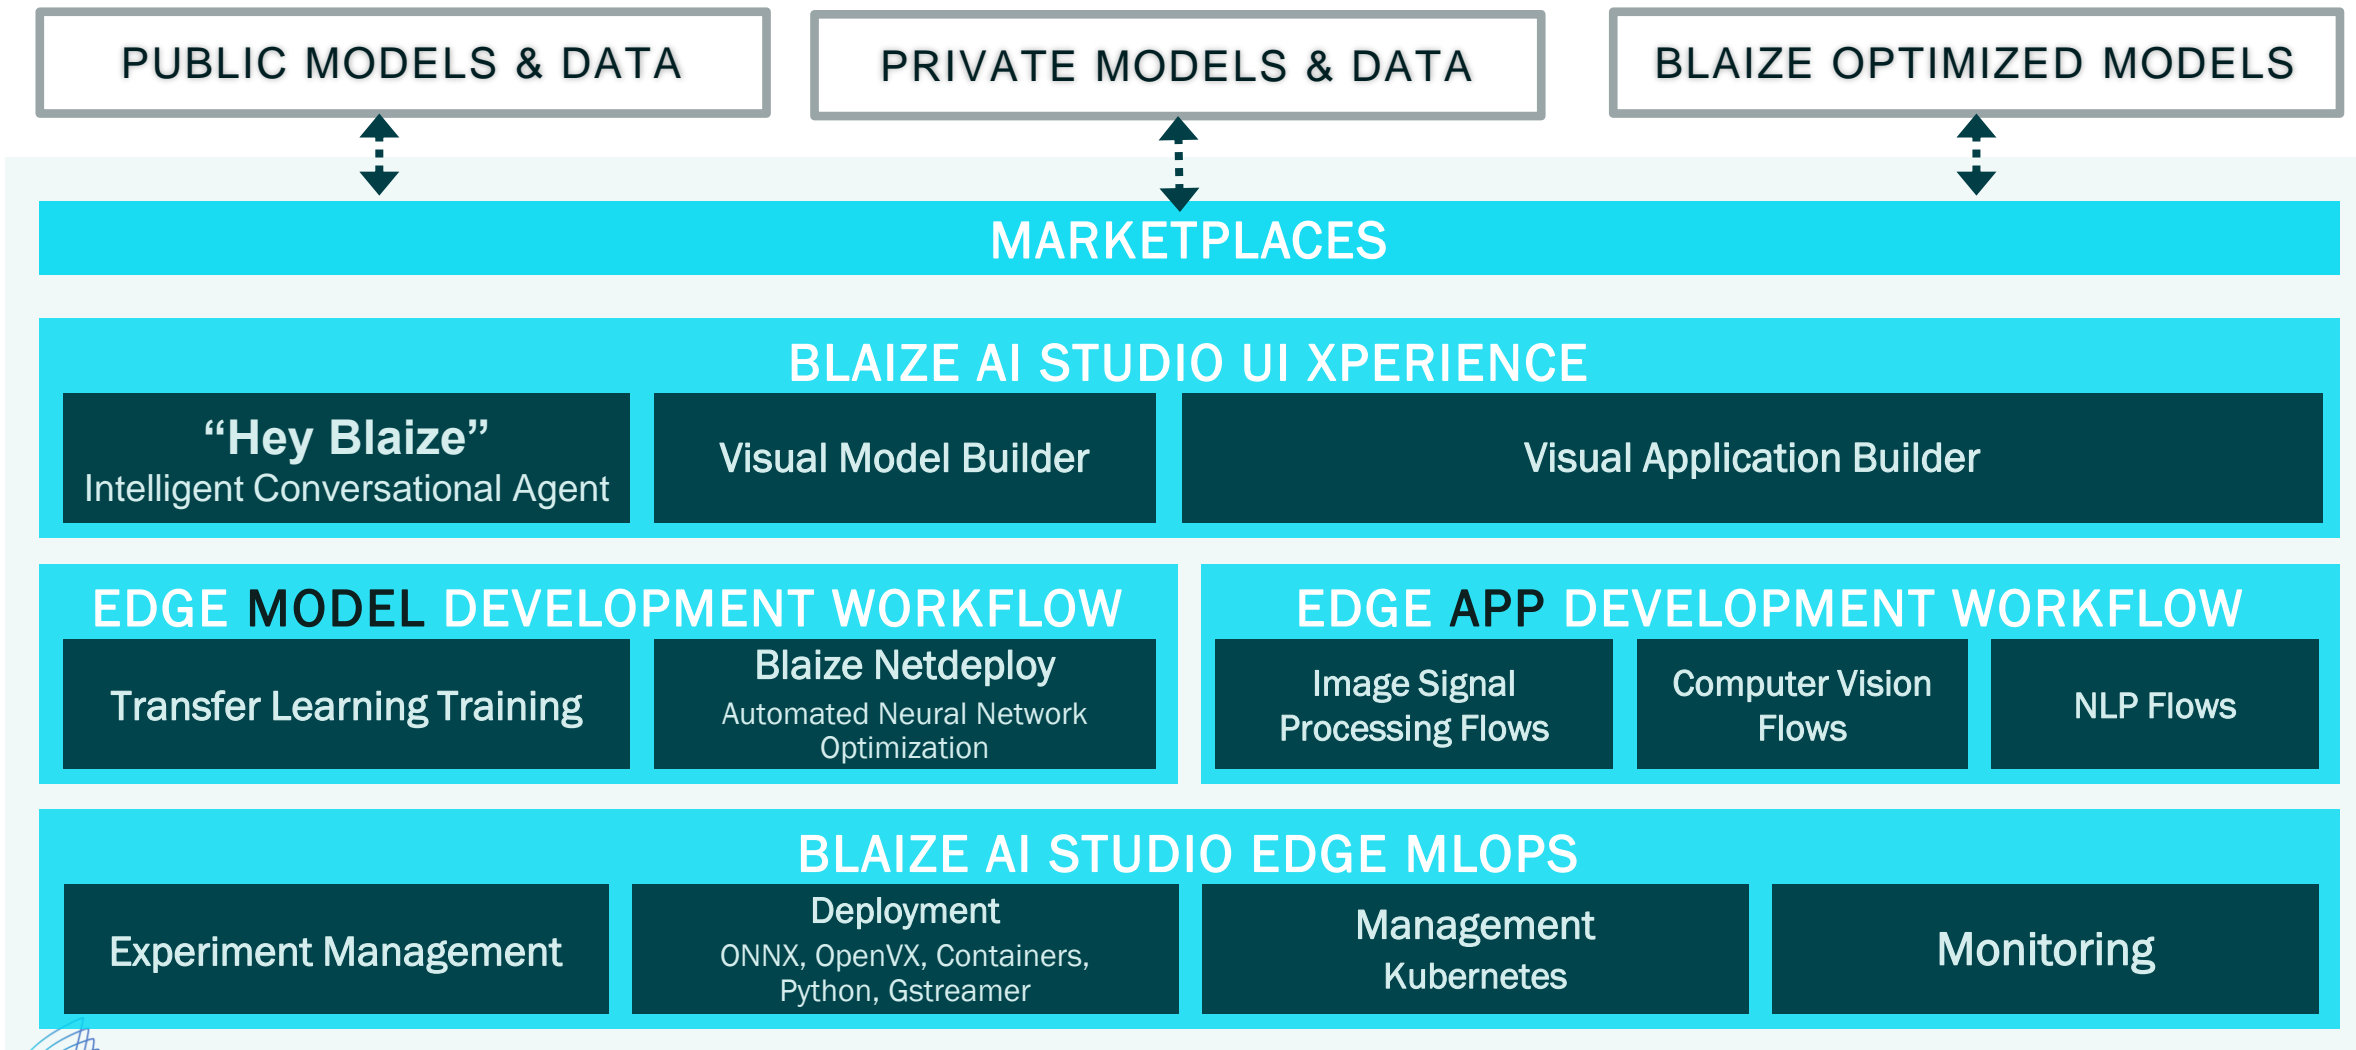

TRANSFER LEARNING FOR EDGE

STREAMLINED EDGE MLOPS

AI Studio Platform

Models & Data: AI App & AI Templates Marketplaces

Embrace Transfer Learning to Build Trust in AI

Transfer Learning Enables Rapid AI Experimentation

Pre-trained models enables 60-70% of the solutions (Booz Allen Hamilton)

Models retrained with client specific data at the “last layer” saving time/ costs

Models you can visually inspect to trust

Open and freely distributed for easy adoption

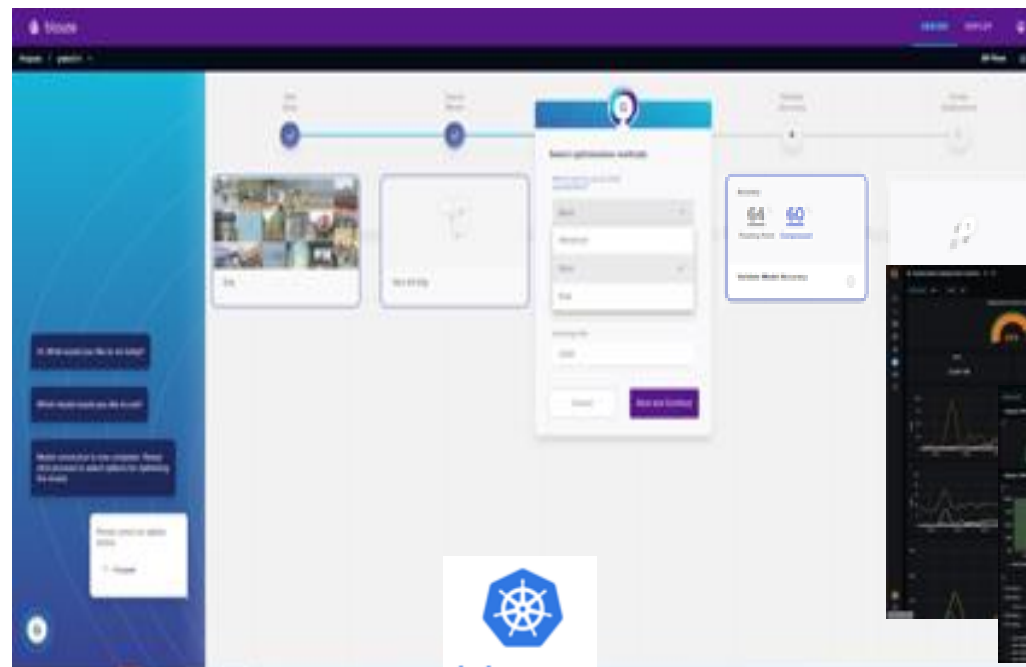

Algorithms, ML frameworks, science packages, training courses, techniques

Custom high-quality synthetic training data

Groundbreaking MLOps for Edge AI Apps

Complete Scalable Platform

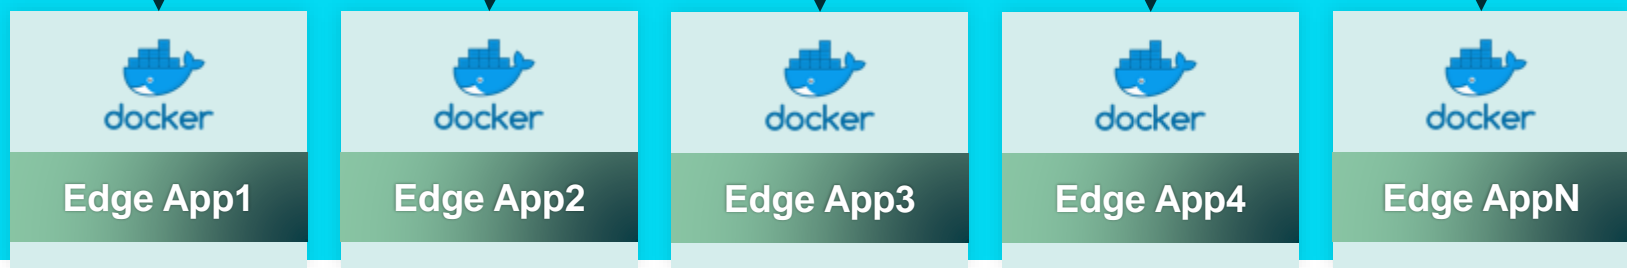

- Cloud & On-premises
- Microservices architecture of containers and Kubernetes
- Scalability, reliability, continuous updates
- Ease of application deployment and management globally

KUBERNETES MANAGEMENT TOOLS

Blaize
Hardware

Introduction to Blaize AI Studio DEMO

Unleash Your AI

Think it. Make it. Deploy it.

- Reduce Application Deployment from Months to Days
 - Code-free Visual Interface: more productivity, more users, knowledge enablement
 - Open standards: user flexibility & broader adoption
 - Marketplaces collaboration: quick access to models, data & apps, knowledge enablement
 - Easy to use App Dev workflow: visually build complete edge AI models and production app
 - Groundbreaking edge MLOps/DevOps: deploy, manage, monitor & improve apps

Adding Personal to AI Computer

Affordable but powerful compute to train + power efficient devices to run

PC Revolution

- Affordable processor
- Easy to use productivity software
- The birth of the internet

Mobile Revolution

- Natural UIs in your pocket
- Low-cost software for every problem in life
- Permanently connected to friends and family via social networks

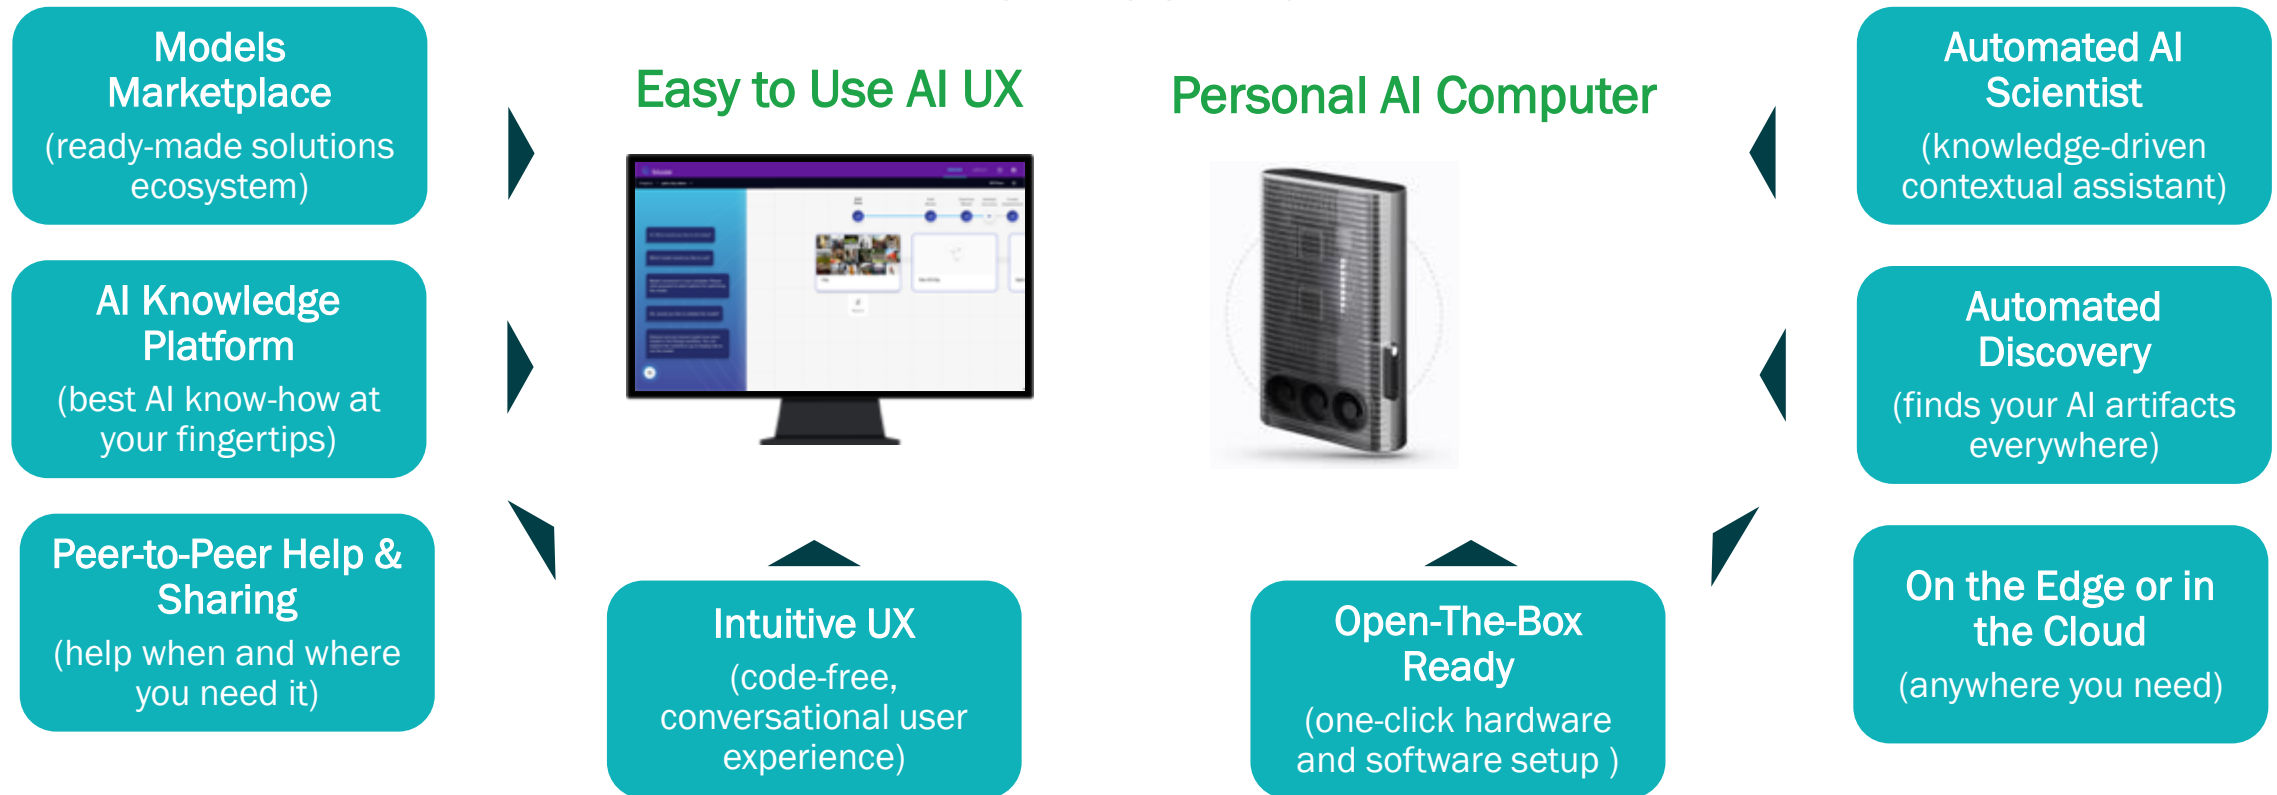

Next Wave: Personal AI Computing

- AI Processors in affordable PCs and peripherals
- Keep private private
- Easy to use software to build AI Apps
- Pre-made, intuitive AI applications for every problem in life
- Self-customizable apps for your needs

Personal AI System That 90% of Population Can Adopt & Use

Age of hyperpersonalization: From personal recommendations of playlists to building your own AI app

THE “MACINTOSH” OF AI

Democratization of AI

Strategy & Philosophy

Data

- Keep data controls with data owners as much as possible
- Connect to the data vs. hog the data

Talent

- Make more people AI-savvy
- Enable developers to become ML/AI developers

Adoption

- Provide complete E2E AI apps not just models
- Spread AI technology

Blockchain

- Growing collective distributed datasets without privileged access for greater benefit
- Train in encrypted facilities

Knowledge Management

- Operate with meta-data instead of data itself
